

## Customer Testimonial

Initially our renovation was looking at just upgrading a very tired looking kitchen. This then progressed to combining a kitchen and living area which involved removal of a wall. From here we went to increasing the size of the kitchen area and moving another wall. As the renovation ideas progressed, the outside of the house and windows became involved. Melpro was more than accommodating when it came to these changes and solved any and all issues that presented themselves as the project developed. All work was completed on time and without complication. Communication between Melpro and us was timely and frequent across the 6 week renovation. We have already recommended and will continue to recommend the Melpro Team to anyone wanting to renovate. We will be using this company for any future renovations.

Cheers
